

## Case Study 14: How to arrange the comparison screens to show cost centre across the top

## By Diana Boxall and Lynn Hutton

This case study is largely taken from section 5.5 of the Support guidance on the main screen of the website, but due to the configuration of the screen on the website the screen shots in that document are hard to view – hence easier to look at this case study

Drag the cost centre dimension box across into columns, and select your chosen version – in this screen shot it is the comparison between Q1 and Q2.=
